

”Denmark’s largest cooperation exercise”

Birgit S. Hansen
KL’s representative in the Green
Tripartite

KL - Local Government Denmark
The association and interest organization
of the 98 Danish municipalities.

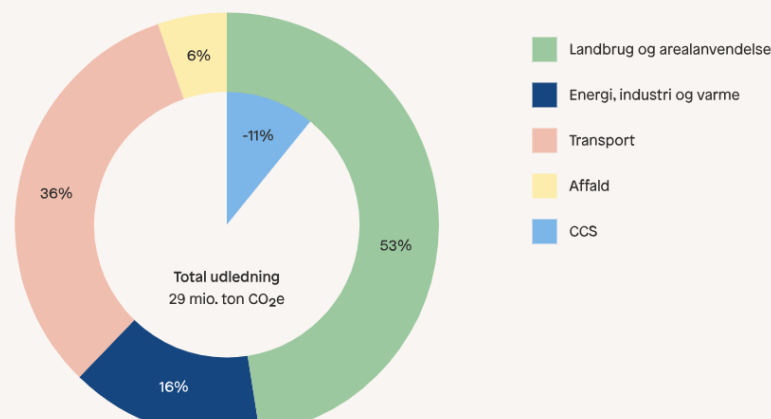

Why Green Tripartite?

- Reduce agriculture CO₂ emissions
- and reach Denmark's climate goals
- Fulfil the EU Water Framework Directive
– and avoid oxygen depletion in our costal waters (13 780 ton N)
- EU Natura Restoration Regulation
- contribute to 20% protected nature

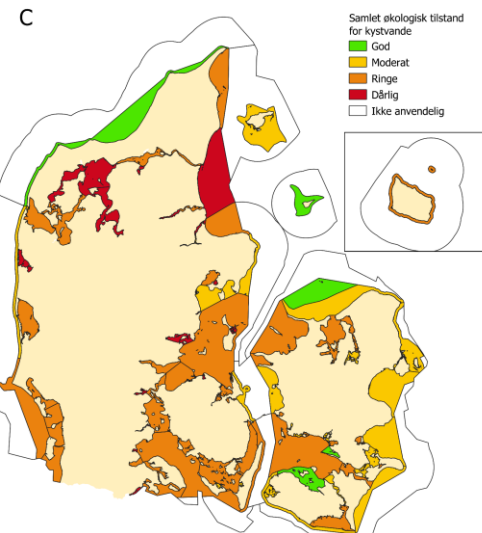

Taking agricultural land out of cultivation is the main tool !

- Think about synergies when agricultural land is to be taken out of use

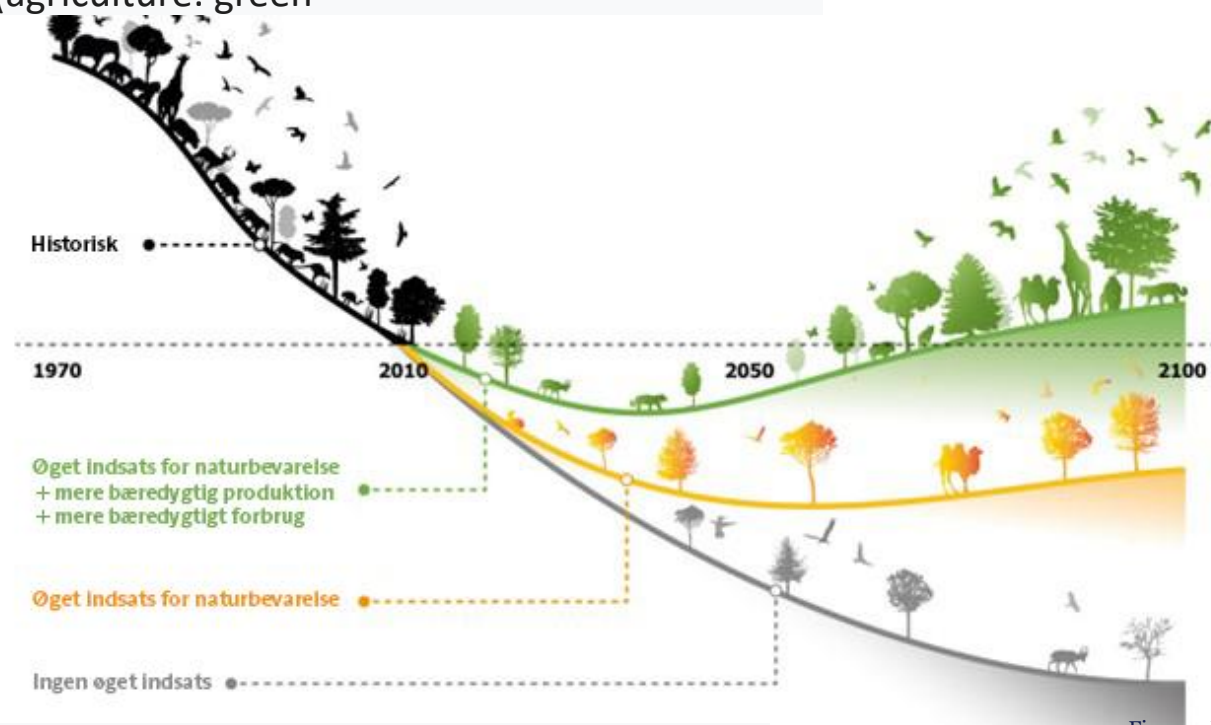

CO₂e udledninger i 2030

CO₂ emissions 2030 without changes
(agriculture: green)

Ecological condition of coastal waters

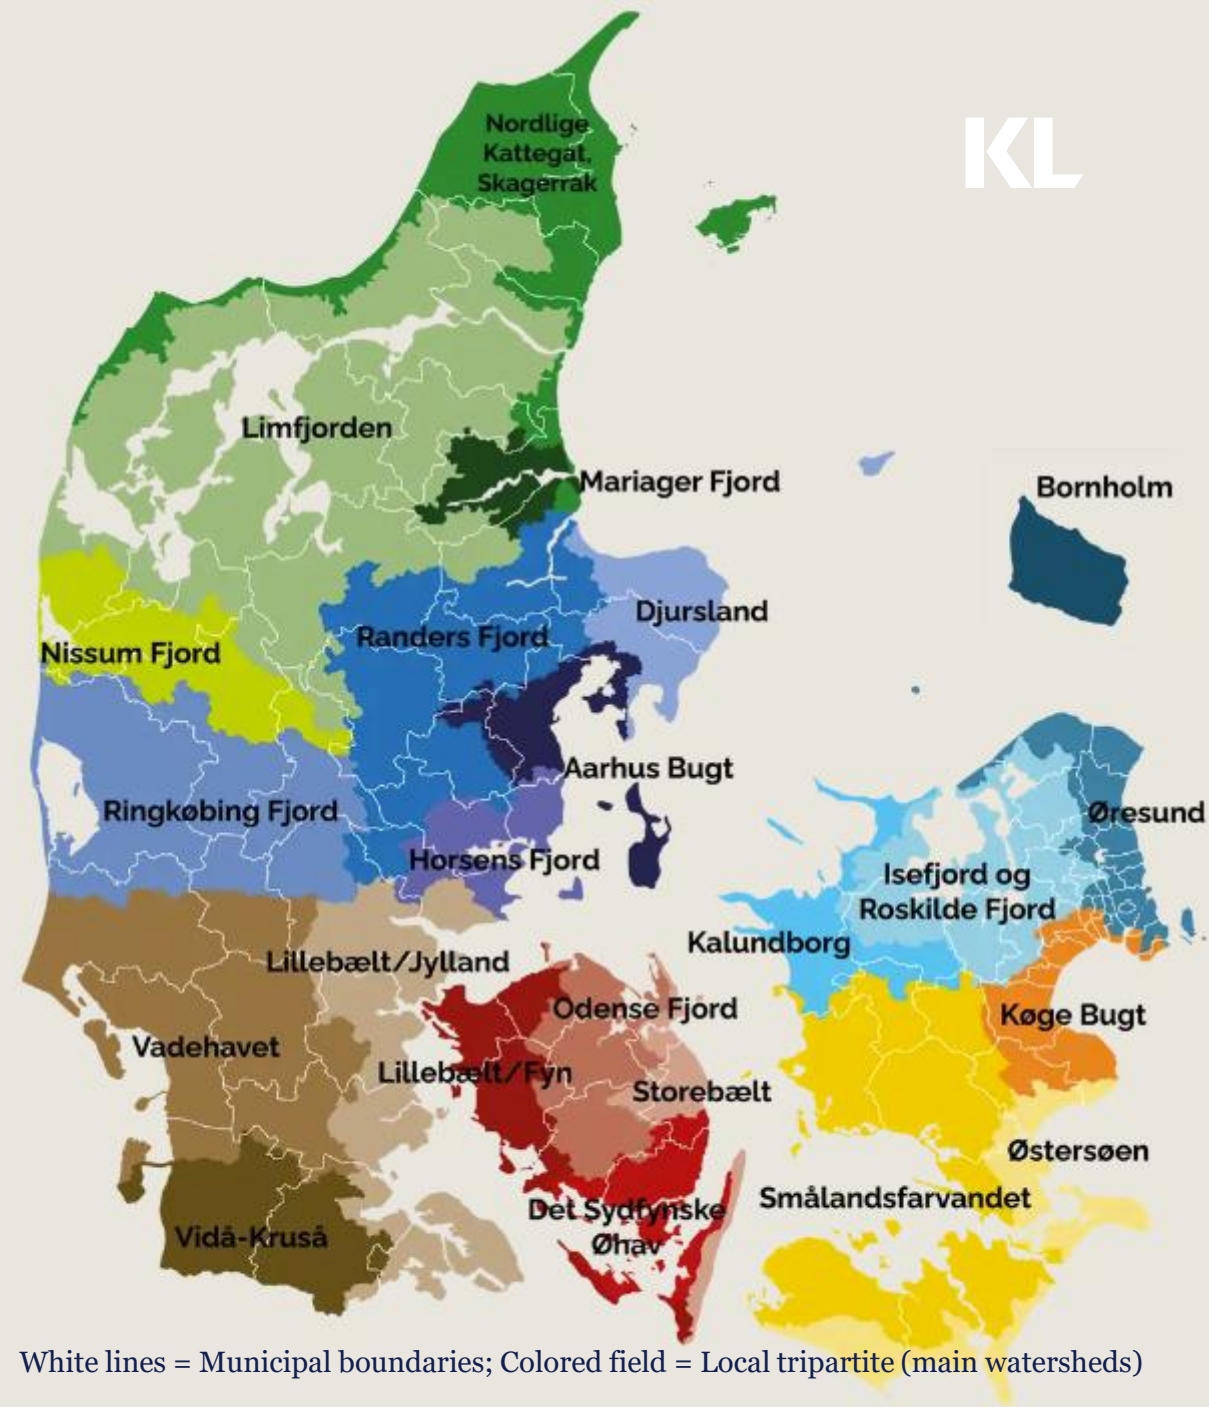

Biodiversity projection - outline

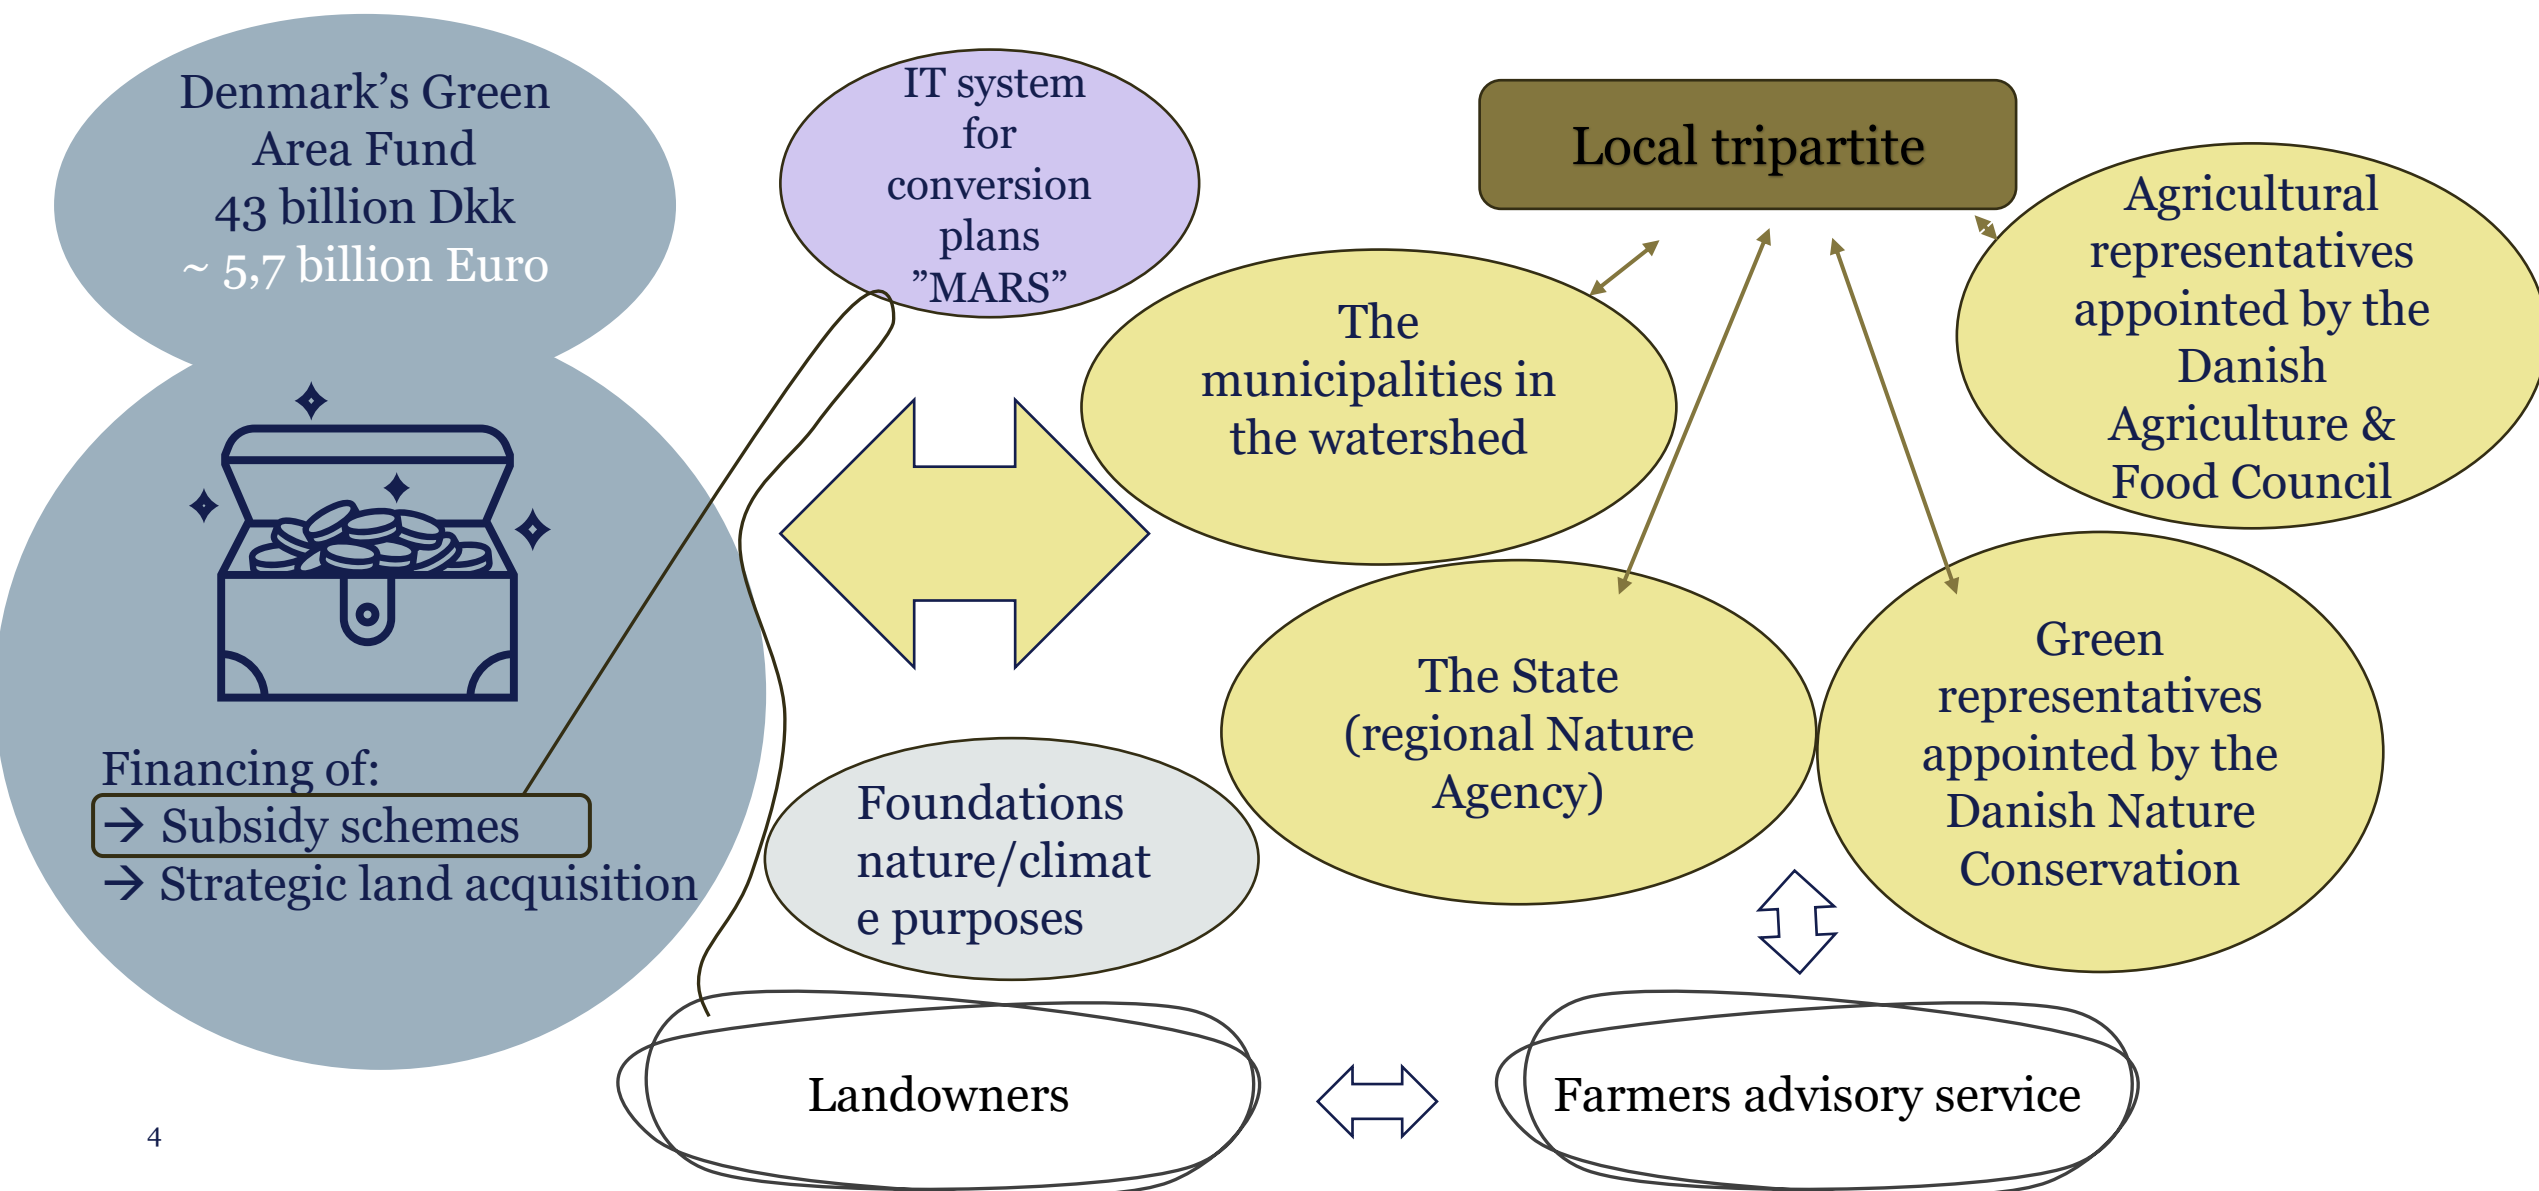

High level of ambition

... And great responsibility for the municipalities

- Dynamic conversion plans in 2025
- Reduction of 13.780 tons nitrogen
- 140.000 ha peat soils rewetted in 2030
- 20 pct. protected nature
- 250.000 ha new forest in 2045
- 43 billions DKK (~ 5,7 billion Euro)
+ 10 billions DDK from Novo Nordisk (~ 1,3 billion Euro)

The task is a shared responsibility

Multilevel collaboration of the agricultural conversion efforts

NATIONAL ORGANIZATION

Minister for
Green Tripartite

Political Forum for
taking agricultural
land out of cultivation

Steering Committee
for taking agricultural
land out of cultivation

Taskforce for taking
agricultural land
cultivation

Working group for
taking agricultural
land out of cultivation

LOCAL ORGANIZATION

Municipal Councils

Local Triplets

Coastal Water Council

Thank you for your
attention
